

## Architecture

Architecture validated by Korian DSI

## Equipment deployed

**Value proposition : Customized and adaptable IoT solution**

**20 devices / homes:** movement, contactor, gas, smoke, energy and water consumption, bed presence, pedometer, weight scale.

## Installation, training & support

### Installation

140 devices installed. 2 hours/ instal

### Training

General 50 carers , Advanced 18 carers

### Support

Collapse 4, Days: 2 days

## Data collection

Sensor activation, battery, connectivity status

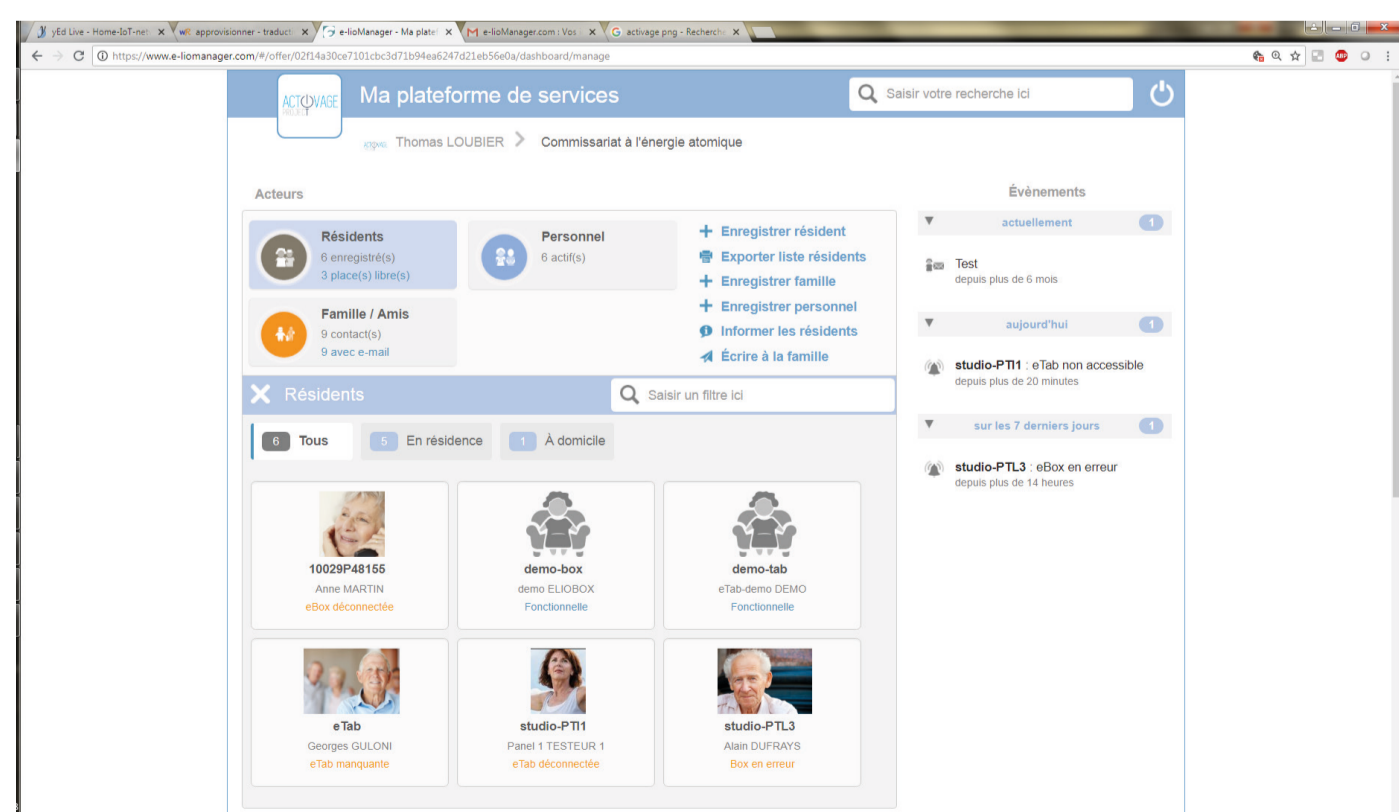

AHA data : autonomy progress, Alarms and alerts,

Home monitoring

Service configuration, personalization, status

Project KPIs

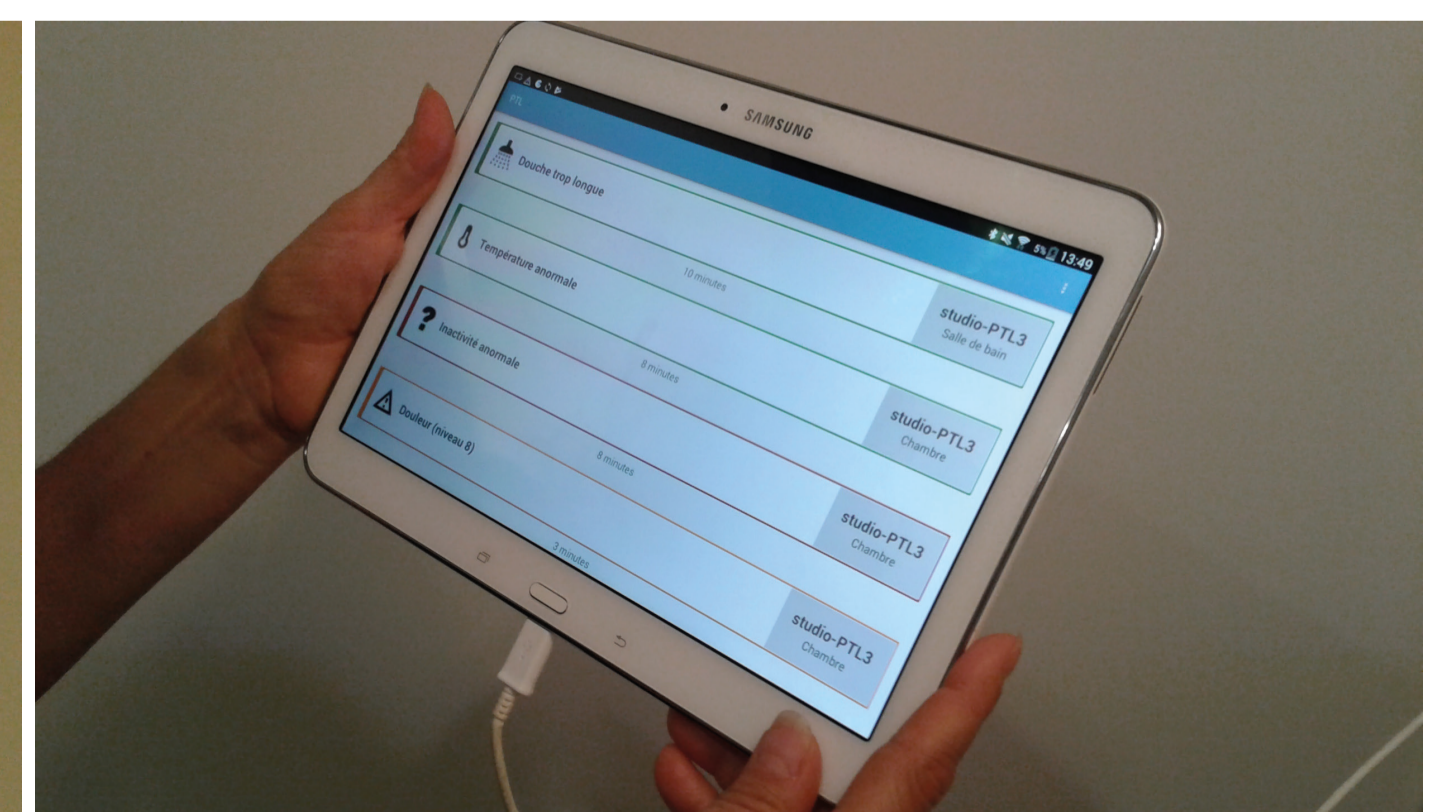

## Services & Apps in use

Web App for Clinic manager

TV Interface for patient

Tablet App for professional carers
